

Appl. No. 09/728,619  
Amdt. Dated November 9, 2004  
Reply to Office Action of August 11, 2004

Docket No. CM04795H  
Customer No. 22917

### REMARKS/ARGUMENTS

Claims 1 and 12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of USPN 6,564,066 (Biggs, et al.) in view of USPN 5,583,869 (Grube, et al.).

Applicants appreciate the time that the Examiner spent during a November 8<sup>th</sup> telephone conference to discuss the claimed invention. Claims 1-21 remain in the application and reconsideration of the application is respectfully requested in light of the amendments to Claims 1 and 12 and the following remarks.

As discussed during the telephone conference, Applicants' claimed invention is not taught or suggested by Biggs and Grube. To make clear Applicants' claimed invention, Applicants' have amended the claims. Namely, Applicants' claimed invention has been amended to clarify that

- a "talkgroup call is between communication units of [a] RF communication system"
- a "console is coupled to a router" and
- "identifying a number of priority console sites for the talkgroup call is based on whether the talkgroup call is a priority."

Support for each of the amendments is found in the Specification in a number of places, including page 6, lines 1-19 and in FIG. 1.
